

WEB DEVELOPMENT

NICOLÁS ADMET

Email: admetnico@gmail.com

Website: <https://nicoadmet.github.io/Portafolio/>

University student and self-taught developer with a strong focus on JavaScript. I am seeking opportunities in full-stack development using React and .NET, aiming to improve coding logic, software design, and database management.

AREAS OF KNOWLEDGE

- Experience in programming Javascript.
- Strong knowledge of React and .NET frameworks
- Understanding of web development fundamentals (HTML, CSS, APIs)
- Basic experience with databases (MySQL, MongoDB)

PROFESSIONAL PROJECTS

Cabin Booking Management System

A web application developed with React (Vite) on the frontend and SQLite with Sequelize on the backend. It features an attractive and user-friendly design, and includes three CRUD modules to manage users, cabins, and bookings

Online supermarket

It is a Single Page Application (SPA) built with React and Next.js. Designed with a clean and attractive user interface. The app includes multiple sections and features such as a shopping cart, dynamic content rendering, and smooth navigation.

LANGUAGES

Spanish

Native

English

Intermediate (B1/B2)
